

Automobilia of Europe: Reference and Price Guide

This is a new edition for motoring historians and enthusiasts which discusses a wealth of items ranging from 1900 to 1950, which are illustrated and priced. It covers lamps, horns, mirrors, clocks, dashboard instruments, tools, spares, clothing, badges, mascots, signs, containers, cigarette cards, maps, publicity material, trophies, motoring novelties, toy cars and concludes with an enlarged section on pedal cars. The book covers every aspect of the automobile of interest to the collector, giving much information on which to base a collection. Prices vary due to the presence of small but important factors relating to age, condition and availability, and it is these factors which this reference and price guide sets out to explain. Both authors have had many years experience in the automobilia market.
