

## The Field of Vision (Bison Book S)

Winner of the National Book Award Wright Morris seems to me the most important novelist of the American middle generation. Through a large body of work --which, unaccountably, has yet to receive the wide attention it deserves--Mr. Morris has adhered to standards which we have come to identify as those of the most serious literary art. His novel *The Field of Vision* brilliantly climaxes his most richly creative period. It is a work of permanent significance and relevance to those who cannot be content with less than a full effort to cope with the symbolic possibilities of the human condition at the present time.--John W. Aldridge One of Americas most distinguished authors, Wright Morris (1910-1988) wrote thirty-three books.
