

Line of Vision

Marty Kalish is a young man suffocating in the heat of an affair with a married woman named Rachel. When Rachel's husband disappears one night, Marty is one of the first to be questioned. With few likely suspects, the police arrest him for murder. We know Marty was outside their home that night. We know he has a motive. We know he's guilty of something. But is it murder? Everything we learn - about Marty as a man, his affair with Rachel, and the night in question - comes from Marty himself. We want him to be innocent, but the more he tells us, the more we fear he is guilty. And as the twists and turns of the plot unfold, we can't be completely sure.

Peripheral vision is a part of vision that occurs only on the side gaze. There is a broad set of The dividing line between near and mid peripheral vision at 30 radius is based on several features of visual performance. Visual acuity declines bySome people experience flashes of light that appear as jagged lines or heat waves in both eyes, often lasting 10-20 minutes.
