

Hot Gourds

This instructional booklet provides advanced instructions on the techniques of pyrocarving. Pyrocarving is a method used most often in wood working and design but can also be employed in the crafting of gourd art. Pyrocarving will allow more delicate cutting of gourds than standard metal tools. Less pressure is needed when using pyrography tools for carving, since the heat will do most of the work.

All About Gourds Burpee. Gourds are best grown from seed planted directly in the garden. Squash plants need extra water during dry and hot periods. I planted my gourds very early this year, they were doing great. I think that I have about 22 usable gourds from 5 stalks, if they all mature. However, in default of dung or glasses, for holding them out as above, plant the more curious sorts of the gourd kinds, in the full ground, in a warm situation.
